

## **DS1500-S**

## **Technical Data**

Diameter

Permissible load 500 kg (in "-1t" Version 1000 kg)

Height 130 mm

Material carrier plate stainless steel
Positioning speed adjustable between 0,5 to 2,0 r/pm

Positioning accuracy better +/- 1°

Rotating angle -200° to +400° Control cable fibre optic cable, POF type (standard)

Tible optic cable, I of type (standard)

Turntable drive chain drive, worm gear
Motor electronic motor 150 W

Drive unit shielded and radio interference suppressed 20dB

1,5 m

 $\begin{array}{c} \text{under Class B} \\ \text{Temperature range} \\ \text{Input current} \\ \end{array} \begin{array}{c} +8 \text{ }^{\circ}\text{C...} + 40 \text{ }^{\circ}\text{C} \\ \text{max. 1,6 A} \end{array}$ 

Operating Voltage 115 / 230V AC (50/60 Hz)

## **Brief description**

The DS1500-S turntable is specifically designed for installation either at intermediate levels in electromagnetic absorption chambers or in open areas. The base plate is available in stainless steel.

If a ground plane exists, and the carrying plate is made of steel, then the adapter contact ring with a quadratic rim can be supplied. A 0,2 m diameter opening in the centre of the turntable provides the capability to insert a power supply for testing. Removable braces can be installed if necessary.

The **IEEE 488** (**GPIB**) **bus**, when operated with the CO2000 Controller, or **IEEE 488** (**GPIB**) & **TCP/IP** (**LAN**) interface, when operated by CO3000 Controller provides an additional control option for all functions.
