The MA4640-XP-ET antenna mast is compliant with **CISPR 16-1-4 BORESIGHT** and **ANSI C63.4** requirements and suitable for use in either open areas or in electromagnetic absorption chambers. Metal

parts are located only in the base plate and the drive mechanism (max. 0,4 m above ground level).

All antennas rotate around their own axis during polarisation to eliminate any elevation errors. Limit switches and the general mechanical design provide a safe system operation.

The IEEE 488 (GPIB) bus, when operated with the CO2000 Controller, or IEEE 488 (GPIB) & TCP/IP (LAN) interface, when operated by <u>CO3000</u> Controller provides an additional control option for all functions.
